

Microsoft Office Migration & Configuration Guide (Updated)

1. Checking Microsoft Office Activation Status

Using Command Prompt:

1. Open Command Prompt as Administrator.
2. Navigate to Office installation directory:
`cd \Program Files\Microsoft Office\Office16`
3. Run:
`cscript ospp.vbs /dstatus`
4. Review license status, last five product key characters, and activation channel.

Using Office Account Window:

File → Account → Product Information.

2. Locating Outlook Email Signatures

Windows: C:\Users\%AppData%\Roaming\Microsoft\Signatures

macOS: ~/Library/Group Containers/UBF8T346G9.Office/Outlook/.../Signatures/

3. Finding the Outlook Autocomplete (AutoStream) File

Windows Auto-Complete Stream File:

C:\Users\%AppData%\Local\Microsoft\Outlook\RoamCache

Look for: Stream_Autocomplete_*.dat

4. Determining Email Account Type (OST, PST, Exchange, IMAP, POP)

Check Account Type in Outlook:

1. Open Outlook.

2. File → Account Settings → Account Settings.

3. Under the **Email** tab, check the 'Type' column:

- **Microsoft Exchange / Microsoft 365** → Uses OST
- **IMAP** → Uses OST (no contacts/calendar sync)
- **POP** → Uses PST

Location of OST and PST files:

OST Default: C:\Users\AppData\Local\Microsoft\Outlook\

PST Default: C:\Users\Documents\Outlook Files\

View Data File Paths:

Outlook → File → Account Settings → Data Files tab.

5. Viewing Server / Account Settings (IMAP, POP, Exchange)

Outlook → File → Account Settings → Account Settings → Select account → Click **Change**.

Exchange: Auto-managed, server displayed under 'Server Settings'.

IMAP: Shows incoming/outgoing server names, ports, security type.

POP: Shows POP server, SMTP settings, and data file path.

6. Exporting Email, Calendars & Contacts to a PST

1. Open Outlook.

2. Go to File → Open & Export → Import/Export.

3. Select **Export to a file**.

4. Choose **Outlook Data File (.pst)**.

5. Select the folders to export (Mail, Calendar, Contacts, etc.).

6. Choose destination and finish.

Important for IMAP: Calendar & Contacts are stored locally and **MUST** be exported manually via PST.

7. Importing a PST File

1. File → Open & Export → Import/Export.
2. Select **Import from another program or file**.
3. Select **Outlook Data File (.pst)**.
4. Browse to PST file.
5. Choose whether to allow duplicates.
6. Select destination mailbox or folder.

8. Exporting Outlook Views & Settings

Export Views:

View tab → Change View → Manage Views → Copy.

Backup Outlook Settings via Registry:

HKEY_CURRENT_USER\Software\Microsoft\Office\Outlook

Export registry branch for:

- Views
- Ribbon customizations
- Navigation pane settings
