

QuickBooks License & Product Code Retrieval Guide

1. Finding QuickBooks License & Product Code in the QuickBooks Software

QuickBooks Desktop:

1. Open QuickBooks.
2. Press **F2** or **Ctrl + 1** on your keyboard.
3. The **Product Information** window will appear.
4. Your **License Number** and **Product Number** are displayed on the right side.

2. Locating QuickBooks License Information in the Windows File System

Configuration File Containing License & Product Code:

Path: C:\ProgramData\Intuit\QuickBooks\qbregristration.dat

- This file contains encrypted license and product data.
- It is readable with Notepad, but most values are encoded.

User-specific INI File:

Path: C:\Users\\AppData\Local\Intuit\QuickBooks\QBW.ini

This file contains:

- Last opened company file paths
- QuickBooks environment configuration
- Some registration references (not full license data)

3. Additional Useful Files

QBInstanceFinder:

Path: C:\ProgramData\Common Files\Intuit\QuickBooks\QBInstanceFinder.ini

Contains instance tracking & version information, not the license itself.

QuickBooks Registration Backup File:

Path: C:\ProgramData\Intuit\Entitlement Client\v8\EntitlementDataStore.ecml

- Can become corrupt → deleting this file forces QuickBooks to re-register.
- Does not directly show license information.
